

AGILIS  
SYSTEMS™

**BOOST CUSTOMER SATISFACTION WITH  
AUTOMATED ETA CALLS TO CUSTOMERS FOR  
APPOINTMENT NOTIFICATION AND VERIFICATION  
PLUS DRAMATICALLY REDUCE NO-SHOW TRIPS**

**SmartCALL** lets you automatically contact customers for arrival notification and verification. Now your customers can be automatically contacted ahead of time so that they can be home when your mobile worker arrives. This means happier customers and fewer wasted trips. **SmartCALL** does the contacting for you by:

- Automatically contacting customers who are next on the schedule.
- If the customer confirms the appointment, **SmartCALL** will automatically send a text message for the mobile worker to proceed to the assigned location.
- If the appointment is not confirmed, **SmartCALL** will contact the next customer on the route until a confirmation is received.
- Automatically rescheduling missed appointments
- Requires **SmartDISPATCH** or **SmartWORKS**

**Benefits Include:**

- Improves customer satisfaction by freeing your customers from being stuck at home for hours waiting for your mobile worker
- Creates a competitive advantage by allowing your customers to be productive (shop, run errands...) and then head home when you're on the way
- Eliminates those costly no-show stops
- Reduces costs by eliminating missed delivery / service calls

**AUTOMATED ETA CALL**

The technician will be at your home in 15 minutes. To confirm-press 1.

Optimize Your Mobile Operations
