

## SMART DISPATCH™

**INCREASE PRODUCTIVITY AND REDUCE OPERATIONS COSTS. USE MOBILE PHONES AND CUSTOM ELECTRONIC FORMS TO REVOLUTIONIZE YOUR DISPATCHING OPERATION**

Web-based work order and work flow management software with real-time status updates and the ability to mobilize business processes in the field establishes a competitive advantage in the industry. **SmartDISPATCH** is the right solution that:

- Creates, dispatches and tracks work orders and job status.
- Quickly finds the right resource for the job.
- Is easy to operate by providing key data in one click.
- Transmit critical work order data to the field in real-time.
- Provides two-way mobile phone instant messaging so nothing gets lost or miscommunicated.
- Insures business process compliance through timely and effective data capture.
- Easily integrates mobile work order / form data between your back office system and mobile workers.

**Now Includes SmartFORMS-  
Electronic Forms on the Handset**

### Benefits Include:

- *Increases productivity... more jobs per day with same resources*
- *Enhances communications with field personnel... reduce calls for updates into the back office*
- *Reduces labor costs through improved first call resolutions with mobile access to job reference documents (blueprints, manuals, schematics)*
- *Reduces equipment maintenance costs... lower mileage reduces operations costs, lowers insurance, reduces accidents and extends equipment life*
- *Improves cash flow*
- *Eliminates field paperwork costs and delays*
