SMART LOCATE™

AN AFFORDABLE GPS LOCATION TRACKING SOLUTION FOR MOBILE WORKERS, VEHICLES AND ASSETS

With mobile resources, effective management depends on knowing where they are and what they are doing. **SmartLOCATE** puts complete, up-to-the-minute location and time card information at your finger tips. **SmartLOCATE** allows you to:

- Affordably track the location of a variety of equipment... mobile phones, wireless modems, black boxes and other GPS devices.
- Pinpoint the current location of your mobile resources on a detailed web-based map.
- Identify drivers, jobs, assets and landmarks with custom icons on the map. Quickly identify a qualified worker closest to the job.
- Clock in / out mobile workers on their handsets.
- Be alerted automatically when a mobile resource enters or leaves a user-defined area (GeoFencing).
- Play back a history of where resources have been for any day or time (Breadcrumb Trail).

Now with Vehicle Maintenance Reports / Alerts - Oil Change, Tire Rotation, Etc.

Benefits Include:

- *Right resources, right place, right time*
- *Increases productivity with better real-time and historical oversight*
- *Verifies time sheets and mileage*
- *Locates misplaced or stolen assets*
- *Reduces traffic offenses by tracking location and speed*
- *Quicker response to emergencies*
- *Reduces wear and tear on vehicles with maintenance reminders such as oil change, tire rotation, etc.*
