

AGILIS
SYSTEMS™

DRIVERS USE GPS TECHNOLOGY TO RECEIVE REAL-TIME AUDIBLE TURN-BY-TURN DIRECTIONS POWERED BY GARMIN

Whether you're delivering goods, making sales, or performing service calls, saving time on the road and avoiding traffic congestion ensures consistent timely arrivals and customer satisfaction.

With **SmartNAVIGATE**:

- Mobile workers use their handset to navigate to their next job location (no data entry required).
- Audible turn-by-turn driving directions are received as the mobile worker drives the route.
- Automatic re-routing occurs when a driver misses a turn based on their current location.
- Real-time traffic, vehicle type and road construction are used to create the most efficient routes.
- Navigation to non-job sites is available via data entry on the handset.
- Requires **SmartLOCATE** or **SmartWORKS**

Now Available With or Without Maps

Benefits Include:

- Saves fuel cost with more efficient routes
- Avoids traffic jams to save drive time and money
- Saves mileage on vehicles
- Enhances customer service with on-time arrivals
- Increases productivity... more jobs per day with same resources
- Saves dispatcher's time by no longer providing directions to job locations
