

Productivity Picks Up for Transport Company with Tracking and DOT Reporting Software

*"The **SmartDOT** application has saved the customer's office staff countless hours and has also reduced the amount of paperwork the drivers are responsible for completing while in the field"*

- Clark Wellman,
Senior Regional Sales Manager,
Agilis Systems, LLC

Challenge

A transportation and distribution company was searching for an MRM solution. Prior to teaming up with Agilis, the company recorded time, fuel tax, and mileage driven on paper forms in the field and spent time-consuming hours filing out required DOT/IFTA reports. They also had no way to track their employees' location or length of stops. Prior to engaging Agilis Systems, they considered two other Mobile Resource Management applications that did not fit their needs.

Solution

The company now deploys Agilis' **SmartLOCATE** solution with **SmartDOT** on blackbox devices in the vehicles. They use Agilis' solutions to track their drivers' location, mileage, routes, and length of stops plus automatically calculate their mileage and fuel tax for required DOT/IFTA reports.

Results

The company has seen improvement in both dispatcher and driver productivity since deploying Agilis' **SmartLOCATE** and **SmartDOT** solution. They have reduced operational costs in the office and have increased productivity in the field by reducing the time spent filling out paperwork and submitting DOT reports. They now have visibility of driver locations and length of each stop allowing management to focus on targeted employee improvement.

Agilis Systems provides transportation and distribution companies with a time-efficient, cost saving, MRM Solution.

About Agilis Systems

Agilis Systems, LLC is a management software solutions company dedicated to providing flexible and powerful applications that enable customers to improve their mobile operational efficiencies and reduce costs.

Agilis Systems' products allow customers to more effectively communicate, organize, report and manage their operations. The suite of applications assists our customers in the management of mobile personnel and in their day-to-day operations. The modular design can be integrated with existing business applications and can easily scale from small organizations to large enterprises.

Agilis Systems focuses on assisting businesses improve their operations through low-cost, high-value mobile software products that:

- * Provide timely mission critical information.
- * Simplify mobile worker management
- * Enhance flexibility and scalability to meet business needs
- * Improve customer service and satisfaction

Optimize Your Mobile Operations
